CONTENTS

No. 1. January, 1938

The Relation of the Anterior Pituitary to Carbohydrate Metabolism. *Jane A. Russell* 1
Physiology of Excretion Among the Arthropoda. *N. S. Royston Maloeuf* 28
Recent Advances in Knowledge Concerning Hearing and Speech. *Phyllis M. Tookey Kerridge* 59
Arterial and Venous Pressure Factors in Circulatory Failure. *Tinsley R. Harrison* 86
The Nutritive Significance of the Amino Acids. *William C. Rose* 109

No. 2. April, 1938

Sympathetic Vasodilator Fibres. *J. H. Burn* 137
The Sites of Formation of Estrogenic Substances in the Animal Body. *George W. Corner* 154
Autolysis and Atrophy. *H. C. Bradley* 173
The Causes and Mechanism of Thrombosis. *Martin Silberberg* 197
Arterio-Venous Anastomoses. *Eliot R. Clark* 229
Undernutrition and Carbohydrate Metabolism. *William H. Chambers* 248
Present Status of the Ergot Question. *Erwin E. Nelson and Herbert O. Calvery* 297

No. 3. July, 1938

The Physiological and Pathological Aspects of Silica. *Earl J. King and Thomas H. Belt* 329
The Rôle of Inflammation in Immunity. *Valy Menkin* 366
Hormones and the Placenta. *W. H. Newton* 419
Pharmacology of the Anesthetic Gases. *M. H. Seevers and R. M. Waters* 447

No. 4. October, 1938

The Formation of the Egg of the Domestic Fowl. *R. M. Conrad and H. M. Scott* 481
Application of the Law of Chemical Equilibrium (Law of Mass Action) to Biological Problems. *Franklin C. McLean* 495
Plant Growth Hormones. *Kenneth V. Thimann and James Bonner* 524
The Physiological Effects of Small Amounts of Lead: an Evaluation of the Lead Hazard of the Average Individual. *A. S. Minot* 554
Factors Concerned in the Duration of Pregnancy. *Franklin F. Snyder* 578
